

futurescaping, speculative design, critical design, ethics, theories, virtue ethics, capabilities approach, care ethics, tools, prototyping, dilemmas, scenarios, worries, **moral imagination**, point to view, future casting, reflection, memory, future(s), generations, **decolonizing the mind**, sensory archiving, collective memory, data privacy, violation, AI, education, politics, embodiment, bio-design, censorship, personalisation, **discovery algorithms**

**In this class we were not
only thinking about what we
can do with new technology,
but also, and more
importantly, should we do it?**
